## Unravelling: Ways of Seeing My Self

Please bring along a camera and notebook and pen. Photography projects will be undertaken outside of class time, to be shared with the group each week.

Note on cameras: any type of camera can be used, whether a compact or SLR digital camera, film camera, Polaroid, toy camera or even a disposable camera. This workshop is about ideas and the things we discover through taking photographs of ourselves and our daily life, rather than about photo techniques.

Additional costs will arise if you decide to print images - students must be aware that these costs are variable and are not included in the course fees. The tutor will be able to advise you of where to get them done and how much they might cost.
